“The creation of something new is not accomplished by the intellect, but by the play instinct arising from inner necessity. The creative mind plays with the object it loves”

Carl Jung

Through our knowledge and significant experience in the industry, we add value to our clients operations and build a long-term relationship that is mutually beneficial. We aim to be the best in our field of expertise.

VALUES

Honesty	Integrity
Respect	Dedication
Reliable	Service

KNOW US BETTER

Access Solution has proven to be a market leader when it comes to your electronic requirements. We have been in existence since 1999.

It was inevitable that Access Solution would meet the challenge of the "digital boom" and provide quality products with a support program in tact.

There are a number of products on the market today but few deliver the results acceptable and reliable for the security industry. The company has extensive background as a full systems provider and in the project management of a diverse range of projects in different markets. We pride our self on the service that we offer to our clients.

Access Solution's footprint in the market and its ability to integrate various security services, combined with ongoing innovations, is clearly, a key differentiation when compared with other competitors. Having worked at leading electronic companies for a total of 10 years, having insight as to how they work, as well as gaining technical expertise, Access Solution opened its doors in 1999.

Access Solution combines many years of safety, with state-of-the-art technology and a highly skilled work force to provide clients with absolute confidence in their electronic requirements.

Access Solution is committed to the principals and philosophies of the worlds' best practices and as a result, have strong commitments to continuous improvements across all security sectors. Professional customer service is one of the cornerstones of our success.

Take up one idea. Make that one idea your life – think of it, dream of it, live on that idea. Let the brain, muscles, nerves, every part of your body, be full of that idea, and just leave every other idea alone. This is the way to success, that is way great spiritual giants are produced.

Access Control: just as electricity is a necessity with the construction of a new building, security has become a vital aspect as well. We are certified installers of the Impro range of products, which is manufactured locally, thus allowing us to provide a service to our clients quickly and efficiently. Our vast range of access control hardware gives our clients the freedom of choice from keypad readers, access tag readers, swipe card readers to fingerprint readers. What's unique about the system is that the software has been designed to capture and control all information that is necessary and required by law for each employee and can be integrated to a time recording system, whereby all the information captured can be used for payroll purposes.

CCTV has become an integral part of our everyday life. An installation of this nature has paid for itself many times over on sites that experience stock shrinkages, intruder invasions and effective staff control. This system allows one to record and view live footage from anywhere in the world on your cellphone or via the internet. Our cameras are designed for indoor and outdoor use.

Intercom Communication has been designed for private residential homes, apartment blocks as well as office buildings. We offer an audio and visual range of products.

Automation of driveway gates, booms, turnstiles, etc. Various types of system available to suite our clients needs.

There are a number of products on the market today, but few deliver the results acceptable and reliable for the security industry. Access Solution has extensive background as a full systems provider in the project management of a diverse range of projects in various markets. We pride ourselves on the quality of service that we offer to our clients.

When asked "who can provide us with a complete Access Control / CCTV system"

the name Access Solution automatically comes to mind!

We strive to satisfy customers and produce a service that is beyond expectations.
